Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 10-12, 19-21, 28-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto (US PUB 2002/0152339 A1).

As per claim 1, Yamamoto discloses a storage processing device, comprising an input/out module including:

Port processors to receive and transmit network traffic; (paragraph 22)

And a switch coupling said port processors; (paragraph 20, 23)

And a control module coupled to said input/output module, said input/output module and said control module being configured to interactively support data virtualization. (paragraph 21)

As per claim 2, Yamamoto discloses the storage processing device of claim 1, wherein said port processors include a port processor with a frame classification module, a virtual target task, and a virtual initiator task (paragraph 29)

As per claim 3, Yamamoto discloses the storage processing device of claim 2, wherein said input/output module and said control module support a virtualization processor including a virtual target, a volume manager mapping block, and a virtual initiator (paragraph 29, line 20, paragraphs 35-39)

As per claim 4, Yamamoto discloses volume manager mapping block provides virtual block to physical block mappings (paragraphs 29 and 42)

As per claim 5, Yamamoto discloses the storage processing device of claim 3, wherein said port processors include a port processor with a frame classification module, a virtual target task, and a virtual initiator task (paragraphs 29, 35-39)

As per claim 6, Yamamoto discloses the storage processing device of claim 5, wherein said port processor utilizes said volume mapping block and said virtual target task to translate received frames from a virtual target to a physical target (paragraph 29)

As per claim 7, Yamamoto discloses the storage device of claim 6, wherein said port processor utilizes said virtual initiator task to transmit frames to the physical target and receive response frames from the physical target (paragraphs 32-34)

Art Unit: 2182

As per claim 8, Yamamoto discloses the storage device of claim 8, wherein the virtual target translates to two physical targets and wherein said port processor utilizes said virtual target task to prepare a command frame for the second physical target and said virtual initiator to transmit said command frame to the second physical target (paragraph 41)

As per claims 9-32, the examiner finds these claims different from claims 1-3 only in statutory category. The references and reasons cited for rejection of claim 1-3 apply in the same manner as applied to claim 1-3. A further note is made regarding claims 9 and 17, the limitation of "at least one host and at least two storage devices" is also disclosed by Yamamoto (paragraph 17)

Art Unit: 2182
